Offer of cooperation on data supply

Dear Sirs,

My name is [Evgenii Bodiagin](#). I am the author of cryptosensors.info.

If you are a blogger, news outlet and the subject of your resource is:

trading, cryptocurrencies, crypto market, crypto exchange, decision making, candlestick analysis, patterns, forecasting, and crypto market monitoring,

you may be interested in the content I can provide for you on an ongoing basis.

I am engaged in processing information about cryptocurrency with the focus on **programming, processing of data arrays using mathematical methods**. The complex of programs I have written makes it possible to consistently obtain data on the quotes of crypto pairs, do various analyses.

A significant part of the processing is done by me programmatically. **That is why it's possible to track interesting situations for more than a thousand cryptocurrency pairs.**

This content can increase the interest in your resource from users, expand the audience.

When necessary, I make the required adjustments in the software processing to ensure the validity of the data being processed. I work with code all the time.

- **Are you interested in the relevant content / data?**
- **What additional data would be of interest to you?**
- **At what intervals would you like to get results?**

You can also find examples of my research at the following links:

- [Research: How and with what to analyze the connections of cryptocurrency pairs?](#)
- [Research: Guide indicators in cryptocurrency trading or the Truman effect in action. Weak correlations are in the arsenal of a trader.](#)
- [Research: Quotes of cryptocurrency pairs. Collection and processing. What should a trader know about?](#)
- [Research: Statistics on the efficiency of candlestick analysis for cryptocurrency trading. Patterns: bull hammer, bear hammer.](#)

In order to view the content, I will send the following data upon your request:

- [Data: Quotes of crypto pairs in xlsx format.](#)
- [Data: Comparable data for ten well-known crypto pairs.](#)
- [Data: Exchange candlestick analysis. Evaluation of the application method and efficiency of patterns. Patterns: Bull Hammer, Bear Hammer.](#)
- [Data: Data for searching the Truman zones ALMOST ALL \(guide indicators for cryptocurrency pairs\).](#)
- [Data: Cryptocurrency pairs Relationships.](#)

The terms of data supply for your resource can be agreed upon in the subsequent correspondence.

I would be glad to mutually beneficial cooperation on an ongoing basis!
